## BPM Certification Coverage Map

<table>
<thead>
<tr>
<th>Area</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Process Management Concepts</td>
<td>15%</td>
</tr>
<tr>
<td>The background, history and concepts of BPM. BPM as a management discipline versus a methodology. The possible benefits obtained when practicing BPM. How it improves organizational performance and provides sustainable competitive advantage. Strategic investment based on aligning process performance to business strategy. The fundamental process concepts behind BPM.</td>
<td></td>
</tr>
<tr>
<td>Process Discovery and Modeling</td>
<td>20%</td>
</tr>
<tr>
<td>The approaches to use during process discovery including key principles, best practices, techniques, valuable tools, and questions to ask. The concepts and principles of hierarchical modeling. Identifying the value chains, value streams, end-to-end processes, sub-processes and activities. Defining a business process architecture. Understanding industry reference models and process classification frameworks. The different ways to express process knowledge. Maps vs models. The different diagram types, when to use each one and how to create each one. The best practices to follow to create and maintain sustainable process models. Modeling pitfalls and how to avoid them.</td>
<td></td>
</tr>
<tr>
<td>Process Improvement (Analysis &amp; Design)</td>
<td>15%</td>
</tr>
<tr>
<td>The concepts and principles of process analysis and design. Ways to identify which process to improve first. Quantitative vs qualitative analysis. Characteristics of a well-designed process. Running an improvement team. The specific methods available to use during process analysis and design. Differentiating one method from another. The different tools, techniques and best practices to obtain analytical insight and optimal design.</td>
<td></td>
</tr>
<tr>
<td>Process Measurement</td>
<td>15%</td>
</tr>
<tr>
<td>Business Process Technologies</td>
<td>20%</td>
</tr>
<tr>
<td>The capabilities of modeling tools and support for different notations. The capabilities of a standalone process modeling tool versus an enterprise modeling tool. The capabilities and use of process simulation. The concepts, design and capabilities of BPMN. Best practices for modeling with BPMN. The concepts, design and functional capabilities of a BPMS. Creating analytical and executable models.</td>
<td></td>
</tr>
<tr>
<td>Process-oriented Enterprise</td>
<td>15%</td>
</tr>
<tr>
<td>The concepts and principles of a process-oriented enterprise. Ways to assess an organization's readiness for Enterprise BPM. Creating a roadmap for adopting BPM. The concepts and models of process governance - both conceptual models and structural models. The concepts, structures and functions of a Center of Excellence.</td>
<td></td>
</tr>

Books
The BPM practitioners who wrote the questions for the BPM certification exam according to the Coverage Map used a number of textbooks as information sources. These textbooks are listed here.

- George, Rowlands, Price, and Maxey; The Lean Six Sigma Pocket Toolbook; McGraw-Hill; 2005.
- Jeston and Nelis; Business Process Management: Practical Guidelines to Successful Implementations; Routledge, 2011.
- Spanyi, Andrew; Business Process Management is a Team Sport – Play It to Win!; Anclote Press, 2003.

Papers

- Fingar, Peter; Systems Thinking: The "Core" Core Competency for BPM, BPTrends, September 2005
- Silver, Bruce; Three Levels of Process Modeling with BPMN, BPMS Watch, April 2008.

OMG Specifications

- Business Process Maturity Model Specification, V1.0
- Business Process Modeling Notation (BPMN), V1.1
- Business Process Modeling Notation (BPMN), V2.0
Industry Frameworks

BPM Practitioners should be aware of these frameworks.

- APQC Process Classification Framework
  [http://www.apqc.org](http://www.apqc.org)
- Supply Chain Council's Supply-Chain Operations Reference model (SCOR), v9.0
  [http://supply-chain.org](http://supply-chain.org)
- Introduction to the Value Reference Model (VRM)
