

Agile BPM in Action

Hands-on Workshop

Agile BPM in Action gives participants hands-on experience applying the concepts, principles, and techniques of agile BPM. You will have an immersive experience in the sprint cycle for agile BPM from sprint planning to sprint demo—reinforcing the previous 3 classes and adding layers of details for implementing this new methodology.

Agile BPM in Action provides participants with practical, hands-on experience for applying Agile BPM concepts, principles, and techniques. The focus is on how to functionally decompose and refine BPM initiatives for agile BPM in order to add value more frequently for customers.

Agile BPM in Action provides hands on experience for any BPM professional who wants to apply agile to Business Process Management. The three previous agile BPM courses provide the foundation for this class where participants gain practical hands-on experience in the agile BPM sprint cycle. From sprint planning to sprint demos, the participants will work through engaging real-world examples learning best practices that can be applied to their own agile BPM programs. Students will learn how to organize and functionally decompose BPM work to create a plan for the MVP. Other concepts like time boxing, estimation using Fibonacci and other scales, sprint integrity, Definition of Done (DOD), and Definition of Ready (DOR) will be examined for use in agile BPM. This course is especially applicable to BPM practitioners who are working with agile teams and for leaders who want to add consistency and more frequent delivery of value to their BPM programs.

WHO SHOULD ATTEND:

- BPM Analysts
- Process Analysts
- Scrum Team Members
- BPM Project Managers
- Business Architects
- BPM Leaders
- Managers in any of these areas

COURSE OUTLINE:

- Agile BPM Sprint Cycle
- Agile BPM Sprint Ceremonies
